

10,000 SERIES PVDF

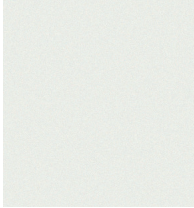

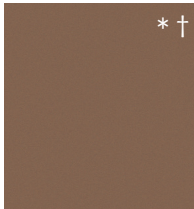

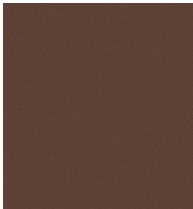

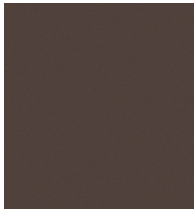

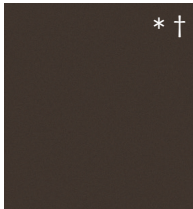

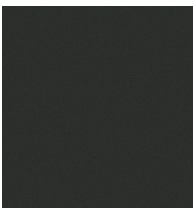

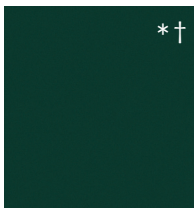

As a Baycoat branded system, we ensure you receive a high quality product that meets your particular needs.

The 10,000 Series paint system is used for projects that demand higher aesthetic performance. It has superior colour retention and formability properties. This paint system is designed for architectural and commercial applications.

The 10,000 Series is a fluoropolymer 2-coat system comprised of a corrosion inhibiting primer and a PVDF colour coat. The colour layer is formulated with PVDF resins that provide lasting colour retention and robust resistance against abrasion and weathering.

10,000 series is available in smooth finishes in a wide variety of standard colours.

Please Note: The colours shown here are representative only and are not intended for colour match purposes. Please contact your mill representative with any sample or technical information requests. This colour card is based on product availability at the time of printing. The manufacturers reserve the right to discontinue colours without

notice. Our standard colours are shown on this card. These colours and additional colours which may be developed for special orders are individually priced.

Colour matching: Colour can vary between paint batches and production runs. Over time, the colour of installed panels will weather. Therefore, it is recommended that multiple orders are not utilized on a single installation where colour matching is critical.
