

BARRIER – EMBOSSSED PVC

Barrier Series is a 2-coat plastisol system available in 4-mil or 8-mil polyvinyl chloride (PVC) topcoat thicknesses, in standard or full coat options (one side or both sides coated).

The topside surface is embossed for uniform gloss and appearance.

Barrier has excellent weathering and protective properties, plus outstanding formability.

The Barrier Series paint system offers a remarkably effective, lasting barrier against the environment. It is used in both residential applications (4-mil) and industrial applications (8-mil) where corrosion resistance is the primary concern.

As a Baycoat branded system, we ensure you receive a high quality product that meets your particular needs.

AVAILABLE IN:

4-mil or 8-mil polyvinyl chloride (PVC) topcoat thicknesses

Effective date September 2022.

Please Note: The colours shown here are representative only and are not intended for colour match purposes. Please contact your mill representative with any sample or technical information requests. This colour card is based on product availability at the time of printing. The manufacturers reserve the right to discontinue colours without notice. Our standard

colours are shown on this card. These colours and additional colours which may be developed for special orders are individually priced.

Colour matching: Colour can vary between paint batches and production runs. Over time, the colour of installed panels will weather. Therefore, it is recommended that multiple orders are not utilized on a single installation where colour matching is critical.

For interior Barrier applications, specify QC1546 Interior White only.
